

These compact and powerful Miko Permanent Magnets are used for a wide range of underwater applications. The material consists of Neodymium which is epoxy-coated for corrosion resistance in sea water. Each type comes in boxes of 10 pcs, packed in a double-skin container to isolate the magnetic field and prepare it for air freight.

Holding Force 60 kg*	Gross Weight (Box) 7 kg	Footprint 40 x 50 mm
Net Weight 0,3 kg	Quantity in Box 10 pcs	Height 20 mm

CHARACTERISTICS

MPM-001

MPM-002

With 5 x 5 mm flange, compatible with MHT-002 Handling Tool

MPM-001 CS

With M8 x 30 mm countersunk screw
